

Anchor Windlass

Powerful solutions for high-speed vessels

Hypac is a world leader in providing lightweight, durable anchor windlasses for a wide range of vessels.

The unique Hypac anchor windlass design is compact compared with conventional windlass designs while still maintaining strength and durability. Hypac anchor windlasses are suitable for use with wire rope, fibre rope, or all-chain anchoring systems.

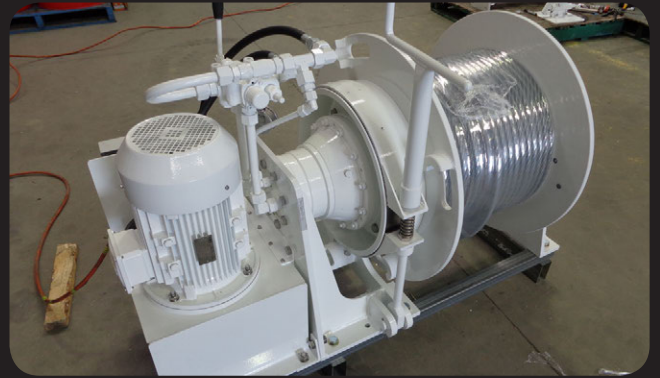

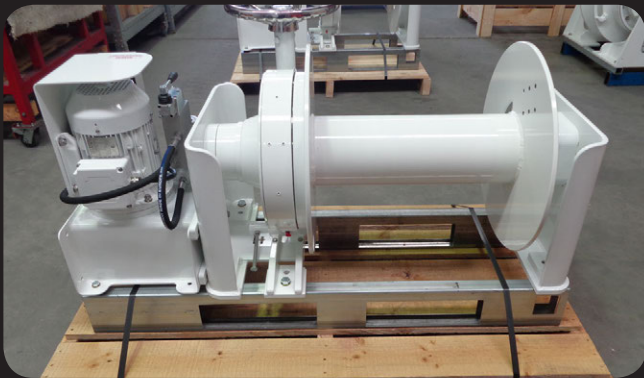

At Hypac, we understand that not all our customer's needs are identical and that is why our dedicated Engineering team, carefully considers every windlass to best match our customers applications.

With over 450 anchor windlasses operating worldwide, we pride ourselves on delivering the highest quality equipment while maintain functionality, reliability and life time support.

Hypac
